

***XLPrint* Matte Paper Inkjet Labelstock**

Media Type: Coated Matte Paper Labelstock

XLPrint Matte Finish Paper Inkjet Labelstock features a bright white matte surface with excellent contrast and good opacity. Designed for use with the Epson ColorWorks and SecurColor inkjet label printers for producing high quality text, barcodes and images.

Adhesive: Cold Temperature Permanent Acrylic

XLPrint Matte Paper Inkjet Labelstock features a permanent cold temperature emulsion acrylic adhesive that exhibits high initial tack and very good adhesion to a variety of substrates including corrugated cardboard, rigid plastics, films, glass, and painted metal substrates. Not recommended for water immersion use.

Applications:

Use ***XLPrint*** Matte Paper Inkjet Labelstock for creating attractive colour labels for cartons, dry food products, name tags and badges, raw materials, sorting bins, and filing systems. You can also use these labels for food products such as deli and bakery items, hospital food trays, and nutritional information labels as this labelstock is suitable for applications where compliance with indirect food contact FDA21 CFR 175.105 is required. ***XLPrint*** Matte Inkjet label material is also well suited for shipping labels, barcode labels, book and resource material labels, specimen sample labels, school labels and more.

Temperature Performance:

- Minimum Application Temperature: -4° C (25° F) / Dry Application
- Service Temperature: -23° C to 93° C (-10° F to 200° F)
- Storage Conditions: 1 (one) year when stored at 22° C (72° F) at 50% RH
